

MODEL 200XP

12" Capacity Hand-Fed Chipper

The Model 200XP blends capability, available options, and excellent performance to give you a dependable 12" capacity chipper without the need for extra weight and price. It's a favorite for **municipalities and tree services** seeking a powerful chipper that's still maneuverable, and its **compact design** makes the Model 200XP easy to tow and position. A feed rate of 120 feet per minute quickly converts large quantities of brush into dimensional chips, and Bandit's solid-weld construction will provide **years of reliable service**.

PRODUCTIVE IN ALL SETTINGS

Found in utility line maintenance operations, growing professional tree services, along the streets of municipalities, and even in rental store outlets, the Model 200XP carries on the rugged reputation and longstanding durability traits of Bandit 12" capacity chippers from years of tested use and experience. Add an optional hydraulic winch, and this machine can be the ultimate in power, portability, and productivity.

THE NEED FOR FEED

Bandit chippers are notably easier to feed, starting with an expansive 45" wide sloping infeed tray that will ensure a smooth flow of material. Two horizontal feed wheels 7-1/2" diameter x 16-3/8" wide powered by two 15.9 CID hydraulic motors grip, fold, compress, and pull material at about 120 feet per minute into the 14" tall by 17" wide throat opening. Brushy, limby, leafy, and lengthy material are within this machine's diet.

MAXIMIZE YOUR UPTIME

The most common maintenance items are easy to access on Bandit chippers, so daily maintenance is quick and simple. Bolt-in knives are easy to change through the chipper hood, and all service areas are conveniently located, including all grease points.

THE PERFECT GEOMETRY

The Model 200XP uses a chipping disc placed at a 45-degree angle to the infeed opening, making it effective at chipping small diameter logs and brush because the cutting action is more inline with the grain of the wood and incoming material. Weight is distributed on a sturdy, balanced frame that provides necessary reinforcement for chipping, meaning less vibration and stress on components, leading to longer life.

DIMENSIONS

Capacity:	12"	30.5 cm
Opening:	14" high x 17" wide	35.6 cm x 43.2 cm wide
Disc:	40" diameter x 2" thick	102 cm dia. x 5 cm thick

RPM: Approximately 1,150 RPM

Hitch: 2-1/2" (6.35cm) pintle hitch w/ safety chains and hooks

Feed System: Slide box feed system with adjustable down pressure springs, (2) 7-1/2" (19.05 cm) diameter by 16-3/8" (41.6 cm) wide horizontal feed wheels powered by (2) 15.9 CID hydraulic motors with bottom clean out door.

Discharge: 360° hand crank swivel discharge with 12" (30.5 cm) adjustable chip deflector

Frame: Main frame constructed with 3/16" x 2" x 6" (0.48 x 5.08 x 15.24 cm) rectangular tubing, with a 1/4" x 3" x 6" (0.64 x 1.60 x 15.24 cm) tongue.

COMMITTED TO QUALITY & PRODUCTIVITY

Since 1983, Bandit has manufactured equipment for a multitude of wood waste processing markets. The vision since the beginning, is to build quality, highly productive, easy to maintain equipment providing years of dependable service.

The commitment for quality, innovation and dedication is instilled in every employee and is one of the main reasons why Bandit became an Employee-Owned Company (ESOP) in 2018. These core values ensure each Bandit machine will leave the factory ready to exceed your expectations.

200XP

MODEL 200XP FEATURES

- **Rope/Line Shear Device (standard)**
Provides an improved chance that rope or lines inadvertently entering the chipper may be cut
- **Last Chance Cables (standard)**
Stops/reverses the feed wheel when pulled in case of an emergency
- **Operator Safety Control Bar (standard)**
Wraps around 3 sides of the infeed chute & controls the direction of feed wheels
- **Wood Pusher Paddle (standard)**
Used to feed small wood debris into the chipper
- **Chipper Hood Pin w/Padlock (standard)**
Prevents unauthorized access to the disc or drum
- **Chipper Hood Engine Disable Plug (standard)**
Prevents engine from being started without the hood pin in place
- **Hydraulic Bottom Bump Bar (option)**
Stops feed wheels via mechanical connection when bumped, diverting hydraulic power away from the feed wheels
