The reman story.

From more product offerings to less downtime during installation, you're sure to appreciate the unique benefits of choosing Case remanufactured parts for your equipment. And today, there are more reasons than ever to make reman a key element of your ongoing equipment maintenance program.

Significant savings

Case remanufactured parts cost less than new parts – offering a great value while ensuring peak performance.

More choices

We're adding more parts to our already extensive reman roster all the time. This expanded offering gives you more options for your equipment needs.

Higher value

It's a fact. When you install our parts in your equipment, you can expect increased resale value.

OEM performance

Unlike "will-fit" parts, each Case remanufactured part is engineered to deliver like-new performance that meets stringent Case engineering specifications.

Prompt credit for your core

Your existing core has value. Your local dealer is equipped to provide a prompt, thorough analysis of your core (core values vary with condition).

Less downtime with installation options

Because many Case remanufactured parts are ready to install, our technicians can spend less time repairing. The result? Less labor hours, quicker turnaround and a whole new level of equipment uptime for you.

Quality

Case remanufactured parts are completely disassembled. All parts are thoroughly inspected and reassembled to the latest OEM specifications.

Superior warranty protection

Unlike no-name competitors or rebuilds, Case remanufactured parts provide same as new, and sometimes better than new, warranty coverage.
