Swing	2875 psi (19,809 kPa)
Tool	3950 psi (27,216 kPa)
Telescope	3150 psi (21,704 kPa)
Crawler	3950 psi (27,216 kPa)
Pilot system	480 psi (3,307 kPa)

Oil capacity

Reservoir 33 gallons (125L), system 55 gallons (208L). Pressurized reservoir with visual oil level gauges.

Filtration system

10 micron with return filter with 100 mesh strainer in reservoir.

Fin and tube-type oil cooler, with thermal by-pass and relief valves.

Pressure compensated load-sensing valves with circuit reliefs in all valves.

Controls

Microprocessor controlled transmitter/receiver radio system. Radio Remote System containing transmitter with 2 dual axis joysticks (hoist & bucket, telescope & swing) and 3 single axis joysticks (crawler controls & tilt). Toggle switch for selection of crawler speed ranges, attachment on/off, throttle speed. Push buttons for engine start, engine stop and emergency stop. Remote transmitter range: 330 ft. (101 m).

Joysticks are self-centering; when controls are released, power for movement disengages and swing, tilt and crawler brakes set automatically.

Secure storage area on machine for transmitter when not in use.

Engine Controls

Separate key switches on machine and transmitter for on/off control. Hour meter and air cleaner condition indicator. Electronic monitor indicates fuel level, low battery charge, coolant level, lube oil pressure, high coolant temperature and engine rpm. Audible (Machine Horn) engine alarm and low transmitter battery alarm system. Beacon is standard and is operational when the transmitter is on.

Swing

Priority swing circuit with axial piston motor. Planetary transmission.

Swing speed: 0 - 7 rpm.

Swing brake

Automatic swing parking brake, spring-set hydraulic release. Dynamic braking provided by hydraulic system.

Undercarriage

Tractor type crawler with triple grouser heavy-duty pads.

Sealed track links, lubricated and sealed idlers and rollers, hydraulic track tension adjustment, track guides, motor and hose guards, front and rear tow eyes.

Track length: 9'10" (3m)

Track pads: 19.7" (500mm)

Overall width: 8'2" (2.5m) with 19.7" (500mm) pads

Ground clearance: 18" (457mm)

Dual range high torque piston motor, 76 hp (57kW), powers each track. Three stage planetary drive with integral speed limiting valve and automatic spring-set hydraulic release wet disc parking brake.

Travel speed on flat, level surface—mph (km/hr):

Speed Selector	
High	2.27 (3.65)
Low	1.59 (2.56)

Travel speed range can be shifted while moving.

Gradeability: 100% Limited by engine lubrication requirements.

Drawbar pull: 18,800 lbs. (83.6kN)

Individual track control. Tracks counter-rotate to pivot machine around on centerline.

Electronically operated travel alarm mounted in counterweight area signals crawler movement in either direction.

Weight

Approximate working weight with 24" (61cm) bucket, 19.7" (500 mm) pads, fuel tank half full:

Weight: 26,250 lb. (11,906 kg)

Bearing Pressure: 6.77 psi (.47 kg/cm²)
