

Service Letter
Reference: SL 14-06

Date: June 27, 2014

To: JLG Customers and Service Providers

Models Affected: JLG 400S and 460SJ Boom Lifts

Subject: Fuel Sensor Reading Inaccurate Fuel Level

Issue:

JLG has determined that certain 400S and 460SJ boom lift fuel tanks with the new fuel sensor part # 1001148607 may experience a $\frac{3}{4}$ fuel level reading when the fuel level is actually full.

Resolution:

It is recommended that Customers who have received machines with serial numbers included on the attached list should inspect the gauge on the platform and the analyzer to ensure that they are reading accurately. If found to be inaccurate, please replace per the Warranty guidelines below.

Warranty:

JLG recommends the installation of this replacement at your next maintenance interval. JLG will reimburse your account the cost of the part, as well as one (1.0) hour labor for each unit completed. No travel will be paid in accordance with this Service Letter. This bulletin will expire 12 months after the date of distribution. Please reference SL 14-06 on your warranty claim.

This part can only be ordered by a local servicing entity of JLG products. The servicing entity must have a JLG account and be capable of purchasing parts and filing warranty claims. When ordering a part the servicing entity will be charged (debited) for the cost of each part.
