"Morbark parts and service...by people who know equipment."

Volume III, Issue IV

Phone (800) 255-8839

Fourth Quarter 2006

Sneak peak at Morbark's new forged hammers...

Morbark, a leader in the wood waste recycling industry, introduces two new forged hammers that like their predecessors will be sure to take the industry by storm. The new hammers will be available for the 6600 & 7600 model Woodhogs.

These hammers are made from forged material that allows Morbark to heat-treat them. The material is steel alloy that will Rockwell higher on the "C" scale than 2" T1 steel.

These new hammers will last longer and be more durable over the long haul, and Morbark brings them to you at a fraction of the cost of T1 steel products.

These new forged hammers are available to customers now. Morbark has been displaying these hammers at the last few trade shows.

If you would like more information about the new forged hammers or the full line of forged hammers, please call Morbark at 800-255-8839 or log on to www.morbark.com.

Morbark's mammoth 1600 tub grinder is the most productive tub grinder in the industry!

Morbark's 1600 tub grinder

From the leading manufacturer of tub and horizontal grinders comes the largest, most productive tub grinder in the industry, the Morbark Model 1600. This monster machine is capable of grinding up to 10' stumps at unprecedented production rates.

The hammermill-nearly 6' in length-was designed to support this tub's unparalleled production rate and operating efficiency. This rugged machine can grind the largest diameter material in the industry because it has the largest base in the industry. With a standard 26-hammer pattern, the 1600 quickly grinds landfill material, mixed debris and large, chunky wood. For regrind applications, change to a 30-hammer pattern in only an hour.

The 1600's standard three-auger system is superior to rubber belly belt construction in that it eliminates damage from steel contamination and provides for a pressure sensor. The Iqan system also boosts production by substantially minimizing downtime. This system is an easy to operate programming tool, which allows the operator to quickly adjust feed system from the control panel to obtain maximum production rates while keeping engine load constant and fuel consumption to a minimum. Five replaceable wear plates are easily unbolted, remove and replaced when worn. In addition, the oil, air and fuel filters are quickly accessible for routine maintenance. The machine is also equipped with a power pack auxiliary

pump.

Suited for storm recovery and large volume mulch and biomass fuel producers, this mammoth machine has an extreme appetite for wood waste of large proportions.

The bar has been raised, and as a result this quality-packed Morbark innovation quickly adds up to a better return on investment now and in the future.

If you would like to learn more about the 1600 tub grinder or any of Morbark's products please call 800-831-0042 or log on to www.morbark.com.

Employee Snapshot

John Gottleber, Assistant Warranty Manager, enjoys all the people he works with. This father of one loves, fishing and hunting.

Gottleber has been employed at Morbark for eleven years. In that time, he has worked in many departments, all the while picking up many skills that he uses in his job daily. Gottleber started out working in the shipping department where he pulled parts to fill customer's orders. He then moved into the ever-busy warranty department. After a few years Gottleber made a brief stint in the parts sales department. After a few months Gottleber went back to his first love the warranty department. His hard work has helped him climb the ladder and he is now the Assistant Warranty Manager.

During Gottleber's free time he enjoys fishing and hunting. He can be found most weekends on a lake some place in Michigan, summer or winter. Gottleber loves spending time with his 4-year-old son Luke. Gottleber says his son loves hot wheel cars and he enjoys playing cars with him.

According to Gottleber the best part of his job is the people he works with. Gottleber also likes helping customers meet all of their grinding goals. Gottleber said "Every single employee at Morbark makes Morbark successful".

Morbark's dealer spotlight

Pape Machinery, Inc. has been a proud Morbark dealer for over 18 years. Pape handles the Northern California, Oregon and Washington states. Pape is an exclusive dealer for industrial equipment and parts. They have a full-line of industrial equipment on site that is for sale. If they don't have the equipment you desire, Pape will get it for you. Along with having equipment on site, Pape has a full-line of parts on hand.

If you are looking to buy a grinder, order parts or maybe you just have a question please call a Pape facility. Pape is always happy to help a customer. Call a facility located near you.
