DESIGNED BETTER. BUILT STRONGER. LASTS LONGER.

THIS IS ENDURAPLAS

Superior Liquid Management Equipment

At Enduraplas we specialize in manufacturing products that help you manage your liquid better. Our large range of liquid storage tanks, tank trailers, spray equipment and water storage solutions are built to last much longer than the industry norm. Using decades of development and research, exceptional design, experience and a relentless passion to innovate, we've made products with your application in mind. Simply put: We know what works.

Built in America. Built to Perform.

Enduraplas products are proudly built in the United States from premium components like quality polyethylene. This guarantees unmatched durability that has consistently outperformed. Since 2003 our liquid management tanks have been built with thicker walls and superior poly materials. Rigorously testing America's strongest tanks has ensured long-lasting durability. Engineered for Endurance® is not just a statement, it's a reality.

Our Vision:

To be the trusted resource for superior liquid management equipment when and where you need it.

ENDURAPLAS ADVANTAGE

ENGINEERED FOR ENDURANCE®

At Enduraplas the success of our products is measured not at one particular moment but at every step throughout the life of the product. To produce something exceptional means to be exceptional in all aspects from conception to creation to implementation and beyond.

The Enduraplas Advantage speaks to the quality and integrity that pervades every step of the product development process. At every phase of development, Enduraplas stands out from the competition. Our products are designed with a higher level of attention to engineered excellence. They are produced with higher quality parts and components. And they last longer in real world applications, where it matters most, which means less downtime, less money spent on repairs, and greater productivity. **We call it the Enduraplas Advantage.**

The message is simple but profound. An advantage isn't something that just happens, but rather it is something that is created through a higher attention to detail and a greater investment in value. Enduraplas Advantage begins with an idea and ends with a product that outperforms and outlasts the competition.

ENDURAPLAS ADVANTAGE

FLAT-SPOT™ DORMER

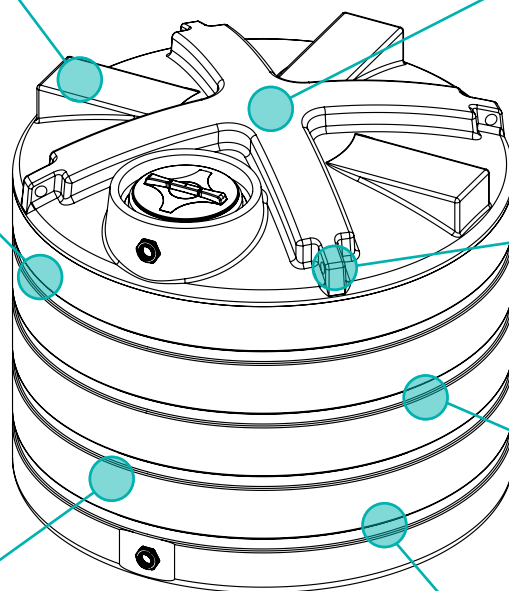

This tank is built with extra heavy-duty spots for plumbing extra tank fittings.

RIBBED-WALL™ STRUCTURE

The ribs act like belts around the tank keeping it in shape. This reduces bulging.

COMPOUND-COLOR™ INGREDIENTS

The tank color is mixed with high density polyethylene using a high-pressure extrusion process. This provides the optimum color distribution to allow even lighter colors to stop light penetration. This process reduces the amount of color pigment making the poly stronger.

STRONG-X™ ROOF DESIGN

The beefed-up roof structure with molded-in truss-like supports eliminates collapsing in the heat of the day.

ANCHOR-POINT™ LUGS

Four hefty built-in lifting and tie-down points at each corner make it easy to handle.

LIGHT-BLOCK™ TECHNOLOGY

Algae needs light to grow. This algae-resistant material keeps the sunlight out and the water pure.

DRINK-SAFE™ MATERIAL

The resin used to build the tank is FDA approved keeping the water safe to drink.

LIGHT-BLOCK™ EXPLAINED

Inside Our Tank

Inside Their Tank

HOW WE STOP ALGAE GROWTH

If light is coming through the sidewall or roof of a water tank, algae will grow. To stop algae growth and keep water pure, we introduced LIGHT-BLOCK™ technology. LIGHT-BLOCK™ technology uses superior raw material to stop light penetration - even on lighter colored tanks.

See more detail on page 7.

"We have been very pleased with our water tank. The bit of sulfur smell and rust in our well water seem to be greatly minimized with the installation of the tank in our water line."

Enduraplas TLV06011
Cleatus - USA Southwest

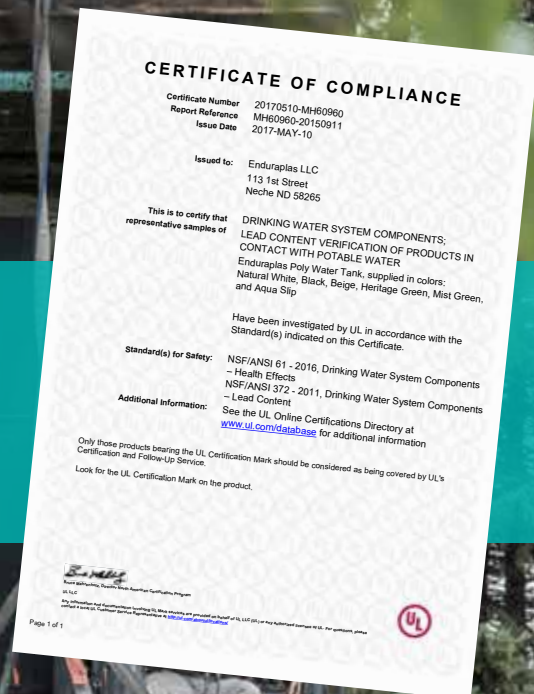

"I am so proud to have four 3,126 gallon water storage tanks for rain water harvesting. The water tanks from Enduraplas were the best choice for me after a lot of research on the quality of the tank and the quality of water after being stored in the tanks."

Enduraplas TLV03000
Wendell - USA Southwest

UNDERGROUND WATER TANKS

TLB SERIES

Featured Image: 1,500 Gallon Under Boss® (TLBW01500FG)

SEAL-TIGHT™ LID

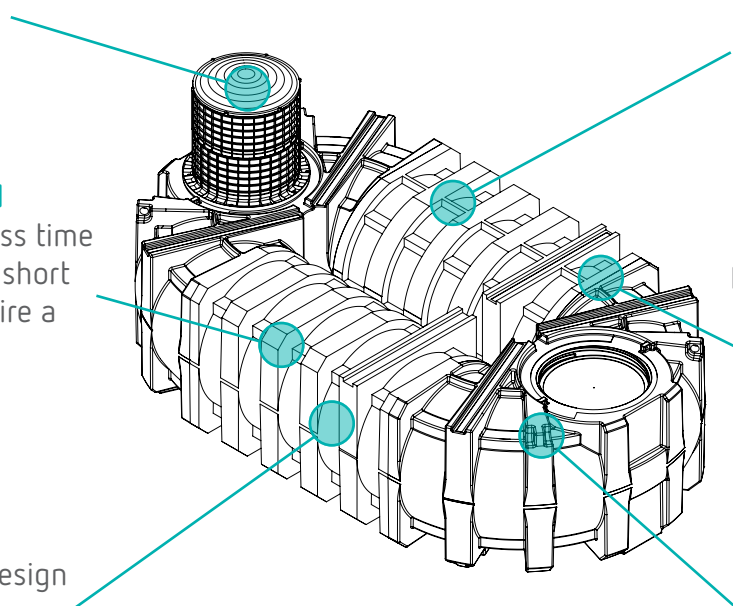

This lid keeps liquid in and keeps dirt out.

LOW-PRO™ DESIGN

With less digging, less time and less hassle, the short design doesn't require a deep hole.

RIBBED-WALL™ STRUCTURE

The reinforce wall design adds to its proven, underground toughness and durability.

SINGLE-PIECE™ CONSTRUCTION

The Rotationally-molded in a single mold means the tank is seamless, water-tight and leak-proof.

SUB-SURFACE™ MATERIAL

Built with chemical-resistant polyethylene, the tank will remain unaffected by soil chemicals. No rust or corrosion. No additional coatings.

ANCHOR-POINT™ LUGS

Four built-in lifting and tie-down points at each corner make it easy to handle.
