

ECOTRAY

ECOTRAY prevents potential leaks from Hydraulic systems dripping onto floors and other internal components. The Skyjack system removes the need for a cumbersome, unsightly “diaper” and is particularly suited for working on sensitive areas, such as decorative flooring, clean rooms and areas where hygiene and concern for chemical contamination are a priority. Unlike other systems that focus on the main hydraulic tray, **ECOTRAY** also protects against leaks from hydraulic drive motors and lifting and steering cylinders when fitted.

Skyjack’s **ECOTRAY** has been designed with essential machine functionality in mind.

Essential functions not compromised include:

- Pothole protection
- Static strap use
- Access to the emergency stop
- Emergency lowering
- Base controls

VERTICAL MAST LIFTS

DC SCISSOR LIFTS

E SERIES DC SCISSOR LIFTS AND MICROS*

KEY FEATURES

- Protects against the whole hydraulic system, not just the main hydraulic tray.
- Hydraulic trays on micro and e-drive models are designed to contain all hydraulic tank oil in case of leak (with plug installed)
- Avoids cumbersome diaper attachment
- Prioritizes machine functionality
- Protected from jobsite debris damage, forklift handling, etc.
- Available as a factory fit or field install option
- Installed in less than 10 minutes
- Absorbent pads changed in seconds
