

FIBERGLASS

MODEL: **P6200 Series** **NEW PRODUCT**

STYLE: **PLATFORM LADDER**

* Energy Diffusing GEometry

- Every rivet backed up by metal part or washer to protect rails
- Internal aluminum spreaders on 8' and 10' models

SPECIFICATIONS

Model No.	Height to Platform	Size	Approx. Width	Approx. Spread	Approx. Cu. Ft. Per Unit	Approx. Shipping Wt. Lbs.
P6202	2'	4'	23-3/8"	29-3/4"	4.2	17.0
P6204	4'	6'	26-7/8"	42"	7.2	24.0
P6206	6'	8'	30-3/8"	54-3/4"	10.9	32.0
P6208	8'	10'	33-7/8"	66-5/8"	15.2	44.0
P6210	10'	12'	37-1/2"	79"	20.1	55.0

DIMENSIONS

Platform: 14-5/8" x 15"	Steps: 3" wide
Front Rails: 3-1/8" wide	Rear Rails: 1-7/8" wide
Flange: 1-3/16" wide	Flange: 1-3/16" wide

FIBERGLASS

MODEL: **7300 Series**

STYLE: **STEPLADDER**

* Energy Diffusing GEometry

- Every rivet backed up by metal part or washer to protect rails

SPECIFICATIONS

DIMENSIONS

Top: 7-1/8" x 14"	Steps: 3" wide
Front Rails: 3-1/8" wide	Rear Rails: 1-7/8" wide
Flange: 1-3/16" wide	Flange: 1-3/16" wide

Werner Co. – the world's leading manufacturer

Werner is a state-of-the-art fully integrated manufacturer and distributor of fiberglass, aluminum and wood climbing products. Control of every step of the manufacturing process ensures quality and allows flexibility to serve the needs of our customers.

Standard of the Industry

Werner ladders are made to last. Our products are backed by over 50 years of product design, testing and evaluation experience. We begin with the best quality raw materials and expertly manufacture those materials into high-strength ladders designed to perform year after year. We convert raw materials, such as aluminum ingot and fiberglass rovings, into the side rails, rungs and other parts used to make ladders, stages, scaffolds and accessories.

All Werner ladders are designed and manufactured to the same rigorous quality standards and with a common goal of building the safest climbing equipment possible. Our products are designed and manufactured to meet or exceed OSHA and ANSI requirements.

Werner offers ladders made from fiberglass, aluminum and wood.

Fiberglass

Werner was the driving force behind the development of fiberglass ladder products. Fiberglass ladders have become the leading choice for both consumers and professionals due to their great value, appearance and suitability for a wide range of applications. Werner uses a proprietary process to manufacture fiberglass reinforced ladder rails. Glass rovings and structural glass mat are impregnated with a thermoset resin and then pulled through a temperature-controlled die to create finished ladder rail. Fiberglass pultrusions are made in numerous colors, are electrically and thermally non-conductive and have excellent structural and weathering properties. Werner's equipment is designed in-house specifically for ladder rail production to offer the best quality and control.

Technologically Advanced Material:

Multiple layers of uni-directional glass rovings and multi-directional glass structural mat create the strong, durable Werner fiberglass rail.

Product Certifications

AMERICAN NATIONAL STANDARDS INSTITUTE

PRODUCT LINES MEET OR EXCEED ANSI CODE

Fiberglass Ladders	A14.5 (2000)
Aluminum Ladders	A14.2 (2000)
Wood Ladders	A14.1 (2000)
375 Lb. Duty Rating (Portable Special Duty Ladders)	A14.10 (2000)
Ladder Jacks	A10.8 (2000)
Extension Planks	A10.8 (2000)

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION CODE

All Type II, I and IA fiberglass, aluminum and wood ladders, ladder jacks and extension planks meet or exceed code. OSHA CODE applies to ladders used in the workplace. Werner Co. recommends Type II or heavier duty rated ladders for these applications.

All Werner fiberglass ladders have electrically non-conductive rails. This is a great benefit for those working near electricity. Fiberglass rails also maintain a smooth surface even after weathering.

Werner ladders are proudly made in U.S.A.
